This document highlights the new features, fixes, enhancements and known issues for the PLX35-NB2 gateway.

1.1 About the PLX35-NB2

The PLX35-NB2 Network Bridge is the ideal solution for system integrators, machine builders, or anyone requiring remote access to machines for commissioning, troubleshooting, or maintenance. Once a Network Bridge is deployed and a ProSoft Connect account has been created, you are ready to remotely access the automation equipment, reducing travel and saving money. The remote connection is made through ProSoft Connect, our secure, cloud-native platform for the Industrial Internet of Things.

1.2 Release Enhancements

Release Version	Release Date	Description
1.8.39	3-June-2024	New Features: Belden Horizon On-Prem support has been added.
		 Fixes and Changes: Fixed – Pop up displayed after factory reset shows port 80. Fixed – ProSoft Discovery Service shows port 80. Fixed – DHCP server function not working on LAN. Fixed – Customer not able to connect to remote network through the PLX35-NB2.
		 Known Issues: Users cannot downgrade to versions prior to v1.6.90 due to new signing key method implementation. Using the file system check process on the SD card may encounter errors on first try. Workaround: Repeat file check process. If it fails again, check SD card. Refer to PLX35-NB2 user manual for additional information. SFTP Server Host Keys not accepted: DSA 1024, ECDSA secp256k1. SFTP Server Host Keys accepted: RSA 2048, RSA 3072, RSA 4096, Ed25519 255, ECDSA nistp256, ECDSA nistp384, ECDSA nistp521.
1.7.1	25-Jul-2022	New Features: None Fixes and Changes: Fixed – Users no longer require the use of port 8080 when accessing the local UI.
		 Change – ProSoft Connect™ is now called Belden Horizon™. Please go to www.prosoft-technology.com for more information. Known Issues: Users cannot downgrade to lower versions from 1.6.90, due to new signing key method implementation. Using the file system check process on the SD card may encounter errors on first try.
		 Workaround: Repeat file check process. If it fails again, check SD card. Refer to user manual for additional information. The following SFTP Server Host Keys are accepted: RSA 2048, RSA 3072, RSA 4096, Ed25519 255, ECDSA nistp256, ECDSA nistp384, ECDSA nistp521. The following SFTP Server Host Keys are not accepted: DSA 1024, ECDSA secp256k1.
1.6.90	7-Apr-2022	 New Features: Login attempts are recorded and the user must wait 10 minutes after 5 consecutive failed attempts. Users can perform packet capture on the LAN or WAN interface from ProSoft Connect. Packet capture file names include timestamp of when the file was created on the gateway. Displays available memory as part of device diagnostics. Option of configuring Subnet Mask and Default Gateway

ProSoft Technology, Inc. Page 5 of 9

parameters in LAN interface.	
Fixes and Changes:	
Fixed - Device disconnecting issue in ProSoft Connect.	
 Fixed - Use of Static Symmetric Encryption Key, Private Key, and Certificate parameters. 	
Fixed - File Relay feature accepts untrusted symbolic links.	
Known Issues:	
Users cannot downgrade to lower versions from 1.6.90, due to new signing key method implementation.	
Using the file system check process on the SD card may encounter errors on first try.	
Workaround: Repeat file check process. If it fails again, check SD card. Refer to user manual for additional information.	
 The following SFTP Server Host Keys are accepted: RSA 2048, RSA 3072, RSA 4096, Ed25519 255, ECDSA nistp256, ECDSA nistp384, ECDSA nistp521. 	
 The following SFTP Server Host Keys are not accepted: DSA 1024, ECDSA secp256k1.

2 Support, Service & Warranty

2.1 Contacting Technical Support

ProSoft Technology, Inc. is committed to providing the most efficient and effective support possible. Before calling, please gather the following information to assist in expediting this process:

- 1 Product Version Number
- 2 System architecture
- 3 Network details

If the issue is hardware related, we will also need information regarding:

- 1 Module configuration and associated ladder files, if any
- 2 Module operation and any unusual behavior
- 3 Configuration/Debug status information
- 4 LED patterns
- 5 Details about the interfaced serial, Ethernet or Fieldbus devices

Note: For technical support calls within the United States, ProSoft Technology's 24/7 after-hours phone support is available for urgent plant-down issues.
