

## Linux Development Module SDK

The LDMdevKit – **Linux Development Module Development Kit** provides developers with the tools to quickly start developing their custom applications.

The LDMDevKit provides the following:

- Linux virtual machine (VM)
- Eclipse IDE
- Preinstalled toolchain and libraries
- Example C applications and example RSLogix5000 ladder files
- User Manual and Developers Guide with all supported Backplane API functions

Please click below to download the **MVI56E-LDM SDK Development Kit (3.1 GB)**
